ABOUT ME

I'm a **Senior Software Engineer** with over **4 years** of hands-on experience in Web development, specializing in the **MERN** stack (MongoDB, Express.js, React.js, Node.js). I've worked across startups and agencies, building responsive, scalable, high-performance web applications. My core expertise lies in frontend development using ReactJS, Redux, Next.js, Tailwind CSS, and Svelte, paired with solid backend knowledge in Node.js, Express, MongoDB, and GraphQL. I've also contributed to UI/UX collaboration, API integration, and full-cycle project execution.

WORK EXPERIENCE

Senior Software Engineer

Skylinx Technologies [10 Oct 2022 – Current]

- Developed MERN stack applications, dedicating 40 hours weekly for on-time project delivery with code quality.
- Created responsive UIs using React, Next.js, and ensured pixel-perfect designs across devices.
- Reviewed code collaboratively, providing valuable feedback and promoting a teamwork environment.
- Translated design mockups into functional user interfaces in collaboration with UI/UX designers.

Software Engineer

TheHelpDesk [1 Mar 2022 – 1 Oct 2022]

- Worked as a Senior Frontend Engineer
- Worked as a Junior MERN Stack Developer
- Build & Implemented REST APIs
- Lead Frontend Developer teams to design and manage projects.

Web Developer

CodeFix [1 Mar 2019 – 1 Mar 2022]

- Designed and developed flexible, reusable UI components for scalable web applications.
- Converted UI/UX designs into fully functional, responsive code using modern frontend technologies.
- Implemented dynamic functionalities to enhance user interaction and application performance.
- Transformed static designs into fully interactive and engaging web experiences.
- Developed and integrated **RESTful APIs** to support dynamic data operations and improve application functionality.

SKILLS:

Frontend Developer

HTML / CSS / SASS / Tailwind / Bootstrap / TypeScript / JavaScript / JQuery / Svelte.js / ReactJS / NextJS

Backend Developer

NodeJS / ExpressJS / MySQL / SQL / AWS Cognito / MongoDB / GraphQL API / RESTful api / PostgreSQL / Firebase

Tools

GitHub / Git / Postman / Docker / Send Grid

PROJECTS

Lucy: <https://test.lucy.hyperlooptt.com/>

- Led the Frontend Team in architecting scalable, modular React.js components, improving code quality, state management, and overall performance. Increased development speed by 40% and deployment reduced from 30mins to 10mins.
- Collaborated with the Backend Team to restructure and optimize backend architecture; implemented a new modular folder structure, enhancing maintainability and scalability.
- Introduced standardized classes for error handling, API responses, and validation, resulting in a 30% reduction in bug reports and faster onboarding of new developers.
- Acted as a cross-functional bridge between frontend and backend teams to ensure clean, consistent, and high-performing code delivery.

XoomMaps: <https://v3.xoommaps.com/>

- Initiated and led the frontend development of the XoomMaps platform from the ground up, establishing robust project architecture and best coding practices.
- Designed and implemented scalable state management and API management systems to ensure smooth dataflow and optimal application performance.
- Integrated advanced Google Maps APIs and Google Drawing Tools, enabling dynamic geospatial features and user-driven interactions.
- Collaborated closely with the Backend Team to align data structures, improve API responses, and optimize backend communication.

Ejuno: <https://ejuno.io/>

- Architected and developed scalable RESTful APIs powering core platform functionalities, adhering to industry best practices and security standards.
- Designed and implemented automated email trigger systems for transactional and event-based notifications, improving user engagement and system reliability.
- Led the integration of Shopify APIs to streamline product order management within the wedding ecosystem, optimizing operational efficiency.
- Integrated and managed Stripe payment solutions, handling secure transactions, subscription plans, and refund operations seamlessly.

ZeroDocs: <https://zerodocs.net/>

- Enhanced and optimized state management across the application by implementing React Context API, improving app scalability and maintainability.
- Provided continuous feature development and support, including adding and removing core functionalities based on evolving product requirements.
- Designed and developed key features such as opening, editing, and managing .doc files within the application, ensuring a smooth user experience.
- Implemented subscription plan functionalities, allowing users to purchase and manage different service tiers seamlessly.

EDUCATION AND TRAINING

Bachelor's of Computer Science

Islamia University Bahawalpur

City: Bahawalpur | Country: Pakistan | Website: <https://www.iub.edu.pk/>
