MUBASHER MUKHTAR

Senior Software & AI Engineer

Lahore, Pakistan | +92 331 7937967 | mubasherali0331@gmail.com

Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Results-driven Senior Full-Stack & Backend Engineer with over 6 years of experience architecting, scaling, and maintaining high-throughput web applications and distributed cloud systems. Specialized in **Node.js, TypeScript, Express.js, PostgreSQL, and MongoDB**, with a strong track record of designing secure RESTful/GraphQL APIs, optimizing complex database queries, and integrating end-to-end FinTech payment architectures (Stripe). Adept at leading engineering initiatives, mentoring cross-functional teams, establishing CI/CD and SDLC standards, and driving asynchronous remote collaboration to deliver enterprise-grade SaaS platforms.

TECHNICAL SKILLS

- **Languages & Core Concepts:** TypeScript, JavaScript (ES6+), Node.js, SQL, HTML5, CSS3/SASS, Object-Oriented Programming (OOP), Data Structures & Algorithms
- **Backend & Databases:** Express.js, PostgreSQL, MongoDB, MySQL, RESTful APIs, GraphQL, Microservices Architecture, Redis, AWS Cognito, Firebase
- **Frontend & Frameworks:** React.js, Next.js, Redux, Svelte.js, Tailwind CSS, Bootstrap, State Management
- **DevOps, Tools & Practices:** Docker, Git/GitHub, Postman, SendGrid, CI/CD Pipelines, System Architecture, Agile/Scrum, Code Review & Mentorship

PROFESSIONAL EXPERIENCE

TURING — Remote
Senior Software Engineer | *Mar 2025 – Present*

- Architected and maintained distributed backend microservices and high-throughput Node.js/TypeScript web applications, ensuring 99.9% system availability.
- Collaborated across global remote teams to optimize RESTful/GraphQL APIs and refactor monolithic legacy codebases, reducing latency by 25% and improving codebase maintainability.
- Streamlined local and staging environments using Docker containerization, enhancing developer onboarding speed and standardizing CI/CD deployment pipelines.

SKYLINX TECHNOLOGIES — Lahore, Pakistan
Senior Software Engineer | *Oct 2022 – Sep 2025*

- Engineered enterprise-level MERN and TypeScript applications, delivering consistent high-impact features within rigorous production deadlines.
- Led technical code reviews, enforced solid software design patterns, and mentored junior developers in asynchronous programming and clean code practices.
- Developed dynamic frontend interfaces using React and Next.js, integrating complex state management with secure backend authentication services.

THEHELPDESK — Lahore, Pakistan
Software Engineer / Senior Frontend Engineer | *Mar 2022 – Oct 2022*

- Designed and deployed high-performance RESTful APIs using Node.js and Express, improving data access efficiency across core platform features.
- Directed frontend development initiatives, modernizing component architecture and optimizing web app performance for enhanced user engagement.

ZONEDWEB — Wyoming, United States
Web Developer | *Jun 2020 – Present*

- Developed reusable UI component libraries and converted legacy static sites into high-performance dynamic web applications using React and Svelte.
- Integrated third-party APIs, authentication providers, and cloud services to ensure reliable real-time data sync across platforms.

CODEFIX — Bahawalpur, Pakistan
Web Developer | *Mar 2019 – Mar 2022*

- Built responsive, cross-browser compatible frontend layouts and developed secure backend endpoints for data processing.

KEY PROJECTS

Ejuno (Link)

- Architected and deployed enterprise-grade RESTful APIs adhering to OWASP security practices and high availability standards.
- Implemented robust **Stripe payment integration** to handle complex recurring subscriptions, automated billing workflows, secure webhooks, and instant refund processing.
- Engineered real-time notification systems and an automated reservation engine capable of handling concurrent scheduling and conflict resolution.

Lucy (Link)

- Spearheaded the full-stack architectural overhaul, converting a legacy setup into a modular, highly scalable repository structure.
- Introduced custom middleware for standardized error handling, uniform API response formats, and strict data validation, decreasing critical bugs by 30%.

- Facilitated seamless technical alignment between frontend and backend teams, accelerating feature delivery cycles and team onboarding efficiency.

XoomMaps (Link)

- Designed the end-to-end frontend architecture, establishing seamless state management and efficient data fetching layers.
- Integrated Google Maps JS SDK and spatial drawing tools to power real-time geospatial rendering and interactive multi-user mapping sessions.

ZeroDocs (Link)

- Optimized application-wide state using React Context API and engineered core rich-text editing features alongside tiered subscription models.

EDUCATION AND TRAINING

Bachelor of Computer Science (BCS)

Islamia University Bahawalpur | *Feb 2018 – Feb 2022*

LANGUAGE SKILLS

- **Panjabi / Punjabi:** Mother Tongue
- **Urdu:** C1 (Proficient User)
- **English:** B2 (Independent User)
